About The Trail...

- ⇒ The Riverview Trail is approximately 3,500' in length.
- ⇒ The Riverview Trail Park property was conveyed as open space to the Town in 1988 as part of the Mountain Ridge Estates Subdivision.

⇒ The Park possesses a high natural resource value due to its significant frontage along the Willimantic River as well as the associated wetlands, uplands and flood plain areas.

⇒ The Park offers many recreational opportunities, such as: fishing, canoeing, kayaking, bird watching and hiking.

- ⇒ Along the trail are numerous environmental and cultural interpretive signs that help to tell the intricate story of this property.
- ⇒ Improvements to the Trail that include parking, signage, wetlands crossings, benches, kiosks were funded by the State of CT Recreational Trails Grant Program in 2004. These improvements further embellished the work to formalize the Trail in 2003 by the Town Dept. of Public Works, Land Use Office and Middle School Students.
- ⇒ The second bridge and two benches located on site were constructed as part of an Eagle Scout project in 2006.
- ⇒ The property is part of a multi-town open space connection between Tolland (King property) and Mansfield (Marrow Meadow) along the Willimantic River. Marrow Meadow can be accessed by simply walking across the Marrow Road bridge over the Willimantic River and take the first right into the Park from the Riverview Trail parking lot.
