

LOT LINE MODIFICATION – SALAMANCA GIRL, LLC

The plan submitted by the applicant involves several proposed modifications to existing lot lines for a number of existing parcels on Pucker Street. The Engineer who designed the plan has indicated the specifics of the changes in text boxes near the relative parcel.

The proposed modifications are subject to the review and approval by the Planning and Zoning Commission since some of the effected properties were subject to a previous approval from the Commission.

Staff has reviewed the proposed modifications and has found that the resulting lot configurations comply with the applicable Zoning Regulations.
