Eric, certainly access for maintenance but we are also considering and offer from someone to allow him to grow hemp on the land out in the back and if that doesn't pan out, Christmas tree's. I hope that is satisfactory, let me know.

Regards, Brian Sweeney

Todd – thanks for delineating a revised configuration that hopefully will coincide with IWA’s goals as well as PZC’s and Mr. Sweeney’s.

Andrew – Brian – Can you please fill us in as to the exact purposes of the crossings – simple maintenance with mechanical equipment? Future driveway crossings for new lots? It would be helpful to know the details at this point so we can properly consider the potentials and accommodate a design. If we all need to get together, please let us know of a couple dates/times that can work for you two.

Thanks!
